## Polygon Swiss Line

Carmex extends the Swiss Line range by offering a new type of polygon inserts and tool holders for external turning, grooving, parting and threading on Swiss-Type machines. Dedicated especially for small parts machining.

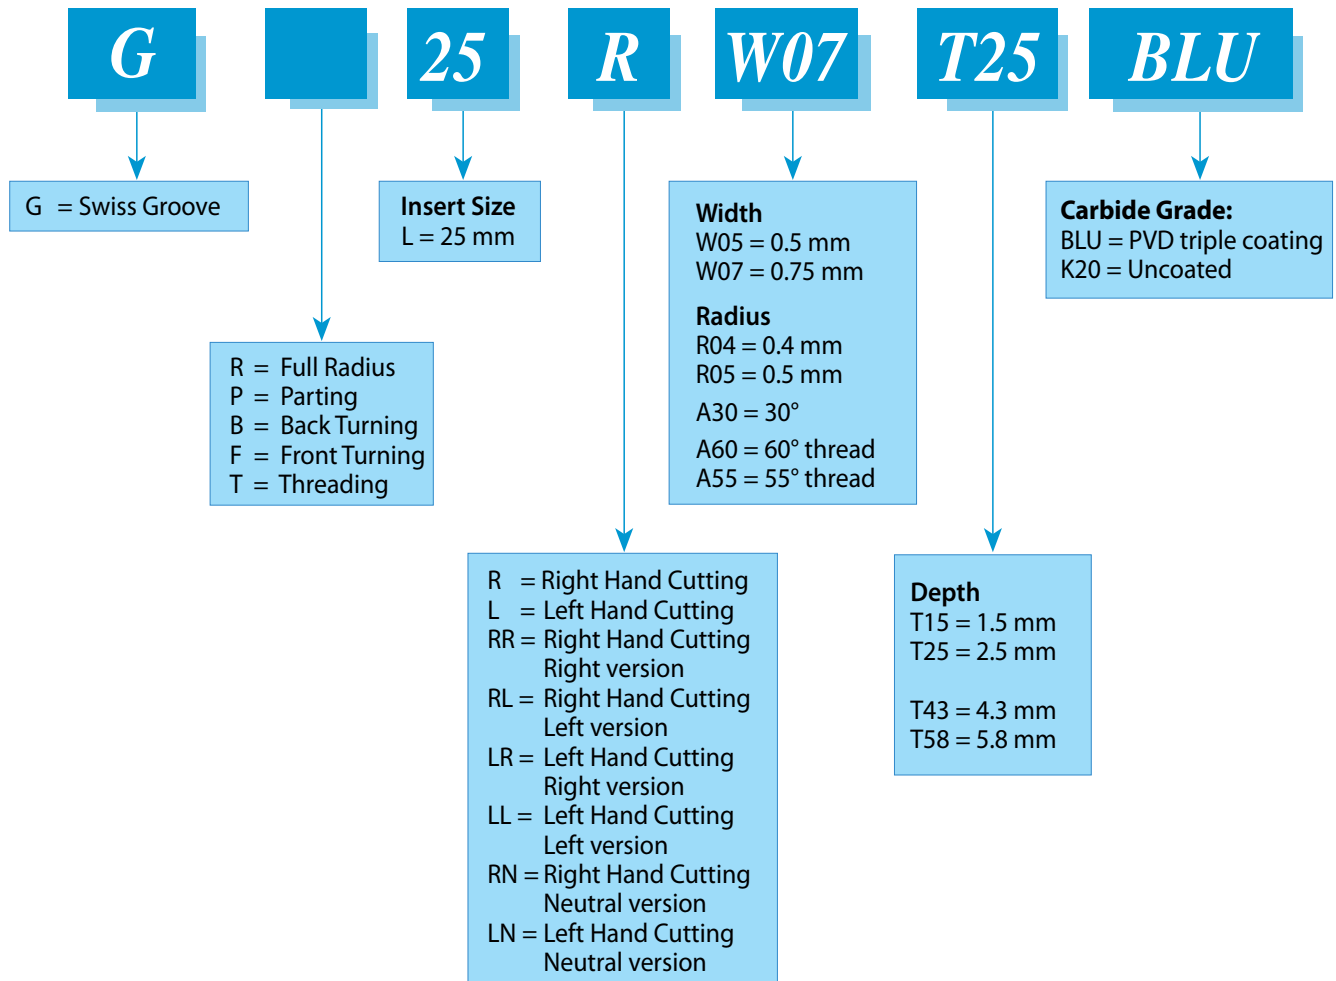

### Features

- High precision ground inserts.
- All inserts can be used with same tool holders.
- A combination of carbide and the latest developed coating guarantees maximum tool life and improved productivity.
- For a wide range of materials.
- Coated holders provides abrasive resistance.

Carbide grade: BLU, K20

<b>H</b>	Hardened Steel, ≤45 HRc	-	20-50

# 6 Cutting Edges Turning Insert - G6

## Grooving, parting-off and threading

### Benefits

- High productivity and cost efficiency due to six cutting edges.
- One holder for all insert types - Maximum versatility.
- High precision thanks to the fully ground profile.

### Features

- Strong and stable clamping due to the unique insert shape.
- Can be used with high machining parameters, and provides high surface finish.
- Internal coolant provides the coolant liquid towards the cutting edge.

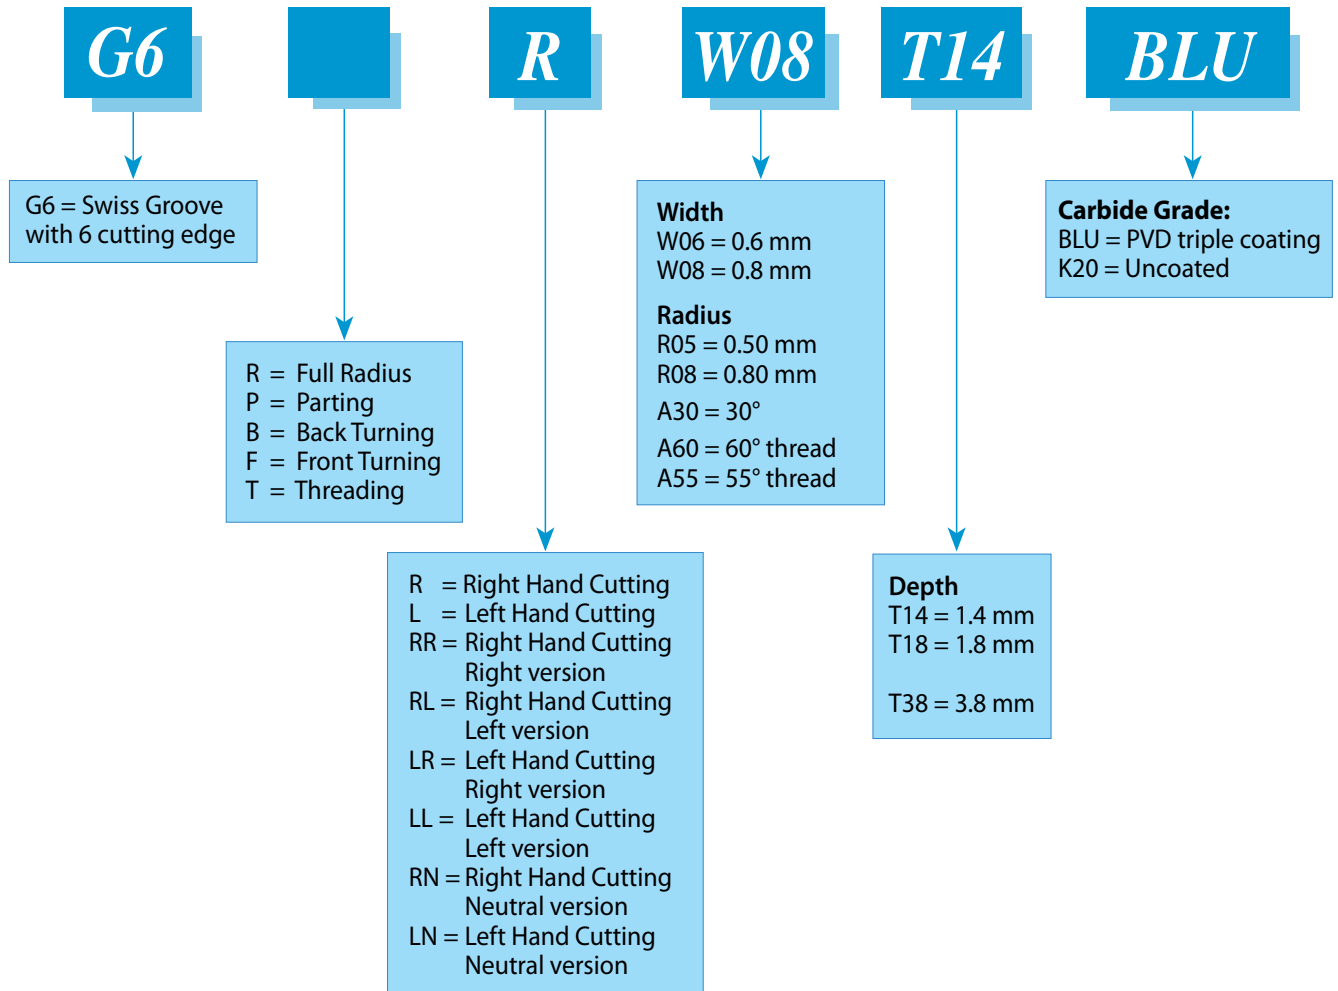

### Application

- Multi-function inserts for grooving, parting, turning and threading.
- Fit to a large range of diameters from very small applications with a thin wall up to 60 mm diameter.

Carbide grade: BLU, K20.

# External Toolholders - G6

Coolant through toolholders, for external turning in Swiss type lathes machines. The high pressure coolant is directed towards the insert cutting edge in order to evacuate the chips created and avoid build up edge. Including a coolant connector for fast attachment on the machine.
